The one nice thing about RAM unlike a processor is that you can replace the RAM and add more after purchasing it. However, make sure to check this as again, companies like Apple have made it impossible to replace the RAM in their computers. It is always worth double checking! 933d7f57e6

Smarter Filters are presets that work with certain filters. Each filter has its own set of presets for a particular effect. For example, a gradation filter has presets for using black and white and colorizing images. Select a Smart Filter and the preset options appear in the preview pane.
