I just added my current subscription to Photoshop , so apparently I already have Photoshop CS2 installed on my new computer. The file was already in ~/Library/Application Support/Adobe/Software/CS3/en\_GB, so I've only been running CS2, and I don't have a CS3 installer on my drive, so it's been WSOD'ing for days.

That's one of the reasons why Adobe launched Sets, the new toolset in Photoshop for audio and video design. The new actions in Adobe After Effects CC 2019 are available in the panel with additional powerful filters and adjustments. Photoshop action panels can be custom made. Users can also make a template from a Photoshop action and use it to do more advance adjustments such as complete color correction and more powerful image adjustments. Users can create very creative or basic designed templates and modify it as best like they want to. Conversely, the examples of including video editing would be [Premiere Pro]([https://en.wikipedia.org/wiki/Adobe\\_Premiere\\_Pro](https://en.wikipedia.org/wiki/Adobe_Premiere_Pro)), DaVinci Resolve, and [Fusion](<https://teampixel.wordpress.com/2016/06/18/peek-behind-the-scenes-of-adobe-fusion-video-editing-tool/>). For a long time now, after about 20 years, I have kept up with what is going on and would like to share with all you wonderful readers what has been going on with me. This is a blog post where I talk about my life, goals, photography, computers and fixes, etc. It is not a blog post about photography. This post is about my goals. How can I make them happen. For example, you can use Smart Objects to easily create a series of edits such as blurring, sharpening, or color correcting a family of images. Once you've completed all the edits, you can save the series as a Smart Object. You can then easily apply the same edits to the entire series of photos. To create a Smart Object, choose Select > Create Smart Object, and begin making edits to the desired image. A dialog box will appear with the original image, and it will appear as though you are making the edits on a new layer in Photoshop. Finally, choose OK to complete the Smart Object creation.
