StarQuiz

Turn your friends into an army of quizzers with starQuiz Cracked Version. starQuiz is a comprehensive yet user-friendly application that comes in handy especially for teachers, to create computerized quizzes with multiple question types, such as fill in the blank, true/false, multiple choice and response, essay or matching. It's wrapped in a straightforward and intuitive layout divided into a question list on the left side of the window, the currently selected query, type, number of given points, and the answer type that varies based on the inquiry. Use customized questions and multimedia items to best design your exams. When the program is run, you have the option to open a sample, to get familiarized with all the functions quicker. You can also go straight to designing a new one, by inserting different questions to best reflect your subject, along with the option to import exams from RTF and TXT file formats and export them. The tool lets you add from the "Quiz" settings, authoring

credentials for each exam, such as title, full name, password, if necessary, and instructions, as well as choose if points should be shown during testing. Plus, you can set a time limit, randomize the inquiries order, show the results to students, as well as hide the desktop while in test mode. In addition, the resource panel enables you to insert images, movies, sounds and explanations. Set up the proper settings and run the questionnaire Formultiple choice and select functions, the app lets you enter up to 26 possible results, fill in the blank can have more than one correct answer, and for numeric, you have the choice to allow an error interval and award a specific score for partial resolution. Last but not least, you can change the interface view, by personalizing it using different font types, styles, colors and sizes. After the test is finished, is recommended to save all the modifications as running it might close it. "Give to the students" button displays a window from where you have to select the testing method, such as on the Internet, computer, local network, paper, or HTML page.

For each category, the program lets you choose if students should input their name or pick from a predefined list. starQuiz Description: Turn your friends into an army of quizzers with StarQuiz. starQuiz is a comprehensive yet user-friendly application that comes in handy especially for teachers, to create computerized quizzes with multiple question types, such as

What's New In?

AnswerCam - The Easiest Way to Track and Review Answering Description: AnswerCam - The Easiest Way to Track and Review Answering

There are two major reasons why you might be looking for a solution like this:*

- You are trying to track your students' answers*
- You need a better way of reviewing their work

The problem is that in most cases, if you ask students to type in their answers, you will have to go back and check each of their answers. Some of them might type them in an unexpected place, others might misunderstand the question. Others might do it in too short of

a time period. And yet others might misspell or misread the words. All of this slows down the process and causes more anxiety. There are a few things that you can do about this, however. You can set up a few templates and require them to type in a given question the same way every time. You can do it with a simple notebook that you have them write their answers in. You can print out each of their answers and check them each time. All of these things work, but they are labor intensive. And if you are a teacher who works with over 50 students, you will want a system that does not get to be too complicated. If this is the kind of problem that you are facing, then you might want to look into the AnswerCam application. It was designed to make this process easier and even to make it fun for your students. Instead of typing in their answers, they will simply have to answer the questions using the camera on their smartphone. It has the capability to track multiple students at the same time. In case you are still having a hard time tracking your students' answers, you can follow the links

below to watch a few videos on how to use the application.*** The Easiest Way to Track & Review Answering1. The Best Way to Track Your Students Answers Using the Camera - Look no further.2. A 3rd Way to Check Your Students Answers - Use the BlackBerry App and the Q10 - 3. A 4th Way to Check Your Students Answers - Use the Android App and the Galaxy S4 - *** The System WorkflowWhen using the system, you will have your students write down their answers on a piece of paper and insert it into the AnswerCam Device. They will then place the AnswerCam Device on the desk and activate it by pressing the green button. Now, that is it. Now all they have to do is answer the questions the same way each time. They will simply answer
